Power: Rechargeable Ion/Litium battery pack DR-202
Dimensions: 107x80,5x38 mm
Weight: 350 gr
Mini-Headphones, battery charger, antenna and transport case included

RS-1047

The portable receiver RS-1047 has been designed to cover a lot of applications together with the following transmitters:

- BS-2000 mobile transmitter
- BS-3507 compact mobile transmitter
- STAR-42 full-duplex reporter unit.
- TR-42 - talkback transmitter

Its innovative desing offers a high sensitivity receiver exhibiting and excellent behaviour against interferences coming from other radio equipment in very RF contaminated sites like in repeaters stations and communications towers.
